

CPD SEMINAR

Suspended Ceilings, Building Acoustics and Applications

This new CPD seminar is divided into two parts, the first part covers general acoustic theory The second part covers the specific issues involved in the acoustics of various environments including the relevant legislation and standards.

The optional areas covered are,

- Offices
- Residential
- Retail
- Healthcare
- Industrial
- Education

On completing this seminar the learner will

- Be confident specifying appropriate acoustic ceilings, compliant with the relevant part E regulations and British/ EU standards
- Be confident to be able to design and specify appropriate acoustic materials
- Be confident explaining the acoustic performance and suitability of ceiling products and installations to their colleagues, clients and regulatory authorities.

Our seminar is free, and should take no longer than 60 minutes, we usually hold the seminar at lunch time over sandwiches.
