

New RIBA Accredited CPD Seminar

Earn double CPD points by attending our informative and enjoyable RIBA Accredited presentation **'Safer Suspended Ceilings and Acoustic Solutions using Stone Wool'** which has been designed to inform about all aspects of stone wool acoustic ceiling solutions. The 45 minute seminar covers sustainability, building regulations, key performance characteristics and illustrates the design freedom made possible with stone wool suspended ceilings.

Rockfon, the ceiling systems division of Rockwool, is a leading manufacturer of Suspended Ceilings, offering a comprehensive range of acoustic solutions including ceiling tiles, baffles, wall absorbers and islands, all made from a 100% stone wool core.

- Rockfon products are known for their design, aesthetics and ease of installation; coupled with the key performance features of superior fire resistance and acoustics.
- Benefits include dimensional stability, even in up to 100% relative humidity, and a non-hygroscopic surface that has no nutritional value, therefore providing no sustenance to harmful micro-organisms such as mould, fungi and bacteria.
- Rockfon ceiling tiles are also 100% recyclable and can be returned to the Rockwool factory for recycling, helping to reduce the burden on landfill sites and limit the depletion of natural resources.
- Rockfon products are used extensively in education, healthcare, leisure, office and retail environments.

Acoustic performance

Suspended ceilings can assist with sound insulation

Fire safety

Gypsum and glass wool ceilings do not withstand fire flames and high temperatures experienced in real fires.

Smoke and toxic emissions - responsible for more than 66% of fire fatalities

Suspended ceilings that meet classes A1 or A2, are suggested to improve safety

Acoustic performance

Building Regulations Approved Document E 2003

Building Bulletin 93

HTM 08-01

The presentation also features a short video clip introducing the manufacturing processes involved in stone wool production and another demonstrating its excellent fire resistant properties. The seminar finishes with a brief summary of the Rockfon company and time for questions and answers.
